PROFESSIONAL SUMMARY

Detail-oriented Post-Graduate (MCA) with a strong foundation in full-stack web development, backend engineering, and database management. Proficient in Python, Java, PHP, and modern web technologies. Adept at building scalable web applications, integrating advanced APIs, and collaborating in agile team environments to deliver high-quality software solutions.

EDUCATION

Veer Madho Singh Bhandari Uttarakhand Technical University, Bhimtal

Masters of Computer Applications (MCA) | Expected August 2026

- **CGPA:** 8.0 / 10.0

D.S.B Campus Nainital, Kumaun University, Nainital

Bachelors of Computer Applications (BCA) | August 2021 – July 2024

- **CGPA:** 8.0 / 10.0

TECHNICAL SKILLS

- **Languages:** Python, Java, PHP, C, C++, JavaScript, HTML5, CSS3
- **Frameworks & Libraries:** Flask, Bootstrap
- **Databases & Tools:** DBMS, MySQL, SQLite, Git (Version Control)
- **Core Competencies:** Full-Stack Development, REST API Integration, NLP
- **Soft Skills:** Problem-Solving, Team Collaboration, Adaptability, Communication

PROJECTS

AI-Powered Smart Job Portal with Career Agent

Technologies Used: Python, Flask, NLP, SQLite, HTML, CSS

- Engineered an intelligent job-matching recommendation engine utilizing Natural Language Processing (NLP) concepts to parse resumes and accurately align candidate profiles with open descriptions.
- Automated personalized career guidance workflows by deploying a smart career agent, significantly reducing manual search friction for active users.
- Optimized backend schema design and query routing in SQLite to ensure high performance, lower latency, and seamless platform scalability.

AI Mock Interview Web Application

Technologies Used: Python, Flask, OpenAI GPT API, SQLite, JavaScript

- Developed an interactive mock interview platform by integrating the OpenAI GPT API to generate dynamic, personalized interview questions and real-time user feedback.
- Designed a seamless, responsive user interface using vanilla JavaScript and CSS to replicate a realistic, low-latency testing environment.

- Implemented a secure backend architecture utilizing Flask and SQLite to manage user profiles, session states, and evaluation data efficiently.

YouTube API Integration Web Application

Technologies Used: PHP, MySQL, YouTube Data API, JavaScript, HTML, CSS

- Architected a dynamic web application utilizing the YouTube Data API to fetch and display real-time video details, optimizing data retrieval speeds by 25%.
- Engineered a responsive, user-centric front-end interface that boosted user engagement metrics by 20%.
- Collaborated actively within a three-member team to streamline backend PHP scripts, ensuring robust data handling and strict adherence to version control protocols via Git.
